The Next Five Months Will Decide This Question

FOR THOUSANDS.

Hundreds of men and women afflicted with coughs, catarrh, bronch ts and consumption are just now congratuating themselves that winter is over and the warm months coming, which brings relief to their weakened lungs and the hope of recovery to their hearts.
One thing, however, is certain, warm

weather will not kill the germs which cause these disc ses and on es, they are destroyed before the next win e; thousands will never see another summer's sun.

Of all seasons in the year, the months of June, July, August and September afford the sufferer from respiratory deeases the best opp run ty to stamp out these terrible sc u g s, and if consumptives and people affected with catarrh and bronchitis can only be taught that this season is the one during which nature exerts all her influence to cast off these diseases, they would do their ui-

most to assist her.
It is perhaps unnecessary to again remind you that according to Government Statistics no remedy ever given for these diseases reduced the dath rate from them in the least until HYOMEL, the new dry-air germicide, was found, and that since then the deaths from consumption alone, have fall n off over per cent annually. Such are the facts, however, and if persons suffering from consumption or any other germ disease of the air passages will use the new remedy fa'thful y during the next five months, they can completely destroy the germs causing the disease and in this way only free themselves from

tuese terrible muladies. No tenspoonful deses are You simply carry the HYOMEI Inhaler in your mouth for ten or fifte in minutes four times daily, and breathe naturally. LARGE PLACES.

The Reverend Mr. Rice Says They Cause Much of the Noise and Discord of Life.

The Reverend J. H. J. Rice, paster of the First Congregational Church at Alton, de-livered an address on "Master in One's Craft" last evening before the All-College Cub at Alten. The club was entertained at the parish-house of St. Paul's Episcopal Church by the rector, the Reverend H. M.

The Reverend Mr. Rice said in part: There is no final place for the inefficient. Life's ceaseless and relentless competition begins after the time element has taken its place in man's career. Charity and patience are forced from the well prepared by the very pathos that the struggle of the eager and aspiring beginner in life's conflict engenders. There is small place in life for the dullard, there is less for the sluggard, there is no place at all for the drone. Life is an earnest and honest endeavor along necessary and legit.mate lines of activity. It has set for its solution an intricate and complex problem, the proper solution of which taxes every energy actual and possi-

bie.

"Man fills only so much of the place allotted to him as he has by his honest and faithful, continual efforts made himself capable of filling. No matter how large the apparent place he may occupy, the real place he fills is just so large as the man has made himself. Much of the noise and discord of lite is caused by the rattle of small men in large places. There are plenty of men who are willing to occupy large and commanding positions, who are not by of men who are willing to occupy large and commanding positions, who are not willing to endure the tremendous mental and moral and physical strain that an hon-est filling of such places demands. To such men there is sure to come, sooner or later, a time when the real place he fills whi be outmeasured by the demand of the situa-tion upon him. Every man must do some-thing that has a double value."

Every mother feels a great dread of the pain

a mother should be a source of joy to all, but the suffering and danger incident to the ordeal makes its anticipation one of misery. Mother's Friend is the only remedy which relieves women of the great

pain and danger of maternity; this hour which is dreaded as woman's severest trial is not only made painless, but all the danger is avoided by its use. Those who use this remedy are no longer despondent or gloomy; nervousness, nausea and other distressing conditions are overcome, the system is made ready for the coming event and the serious accidents so common to the critical hour are obviated by the use of Mother's

and danger attendant upon the most critical period of her life. Becoming
